Disclaimer: Information in the brief course outline is subject to change. The syllabus posted on OWL is the official and authoritative source of information for the course.

### Course Description:

An introduction to the role of financial management including financial markets and analysis, time value of money, capital budgeting and pricing of bonds, stocks, risk and return and general valuation.

### Learning Outcomes:

- Identify financial issues affecting corporations and their managers
- Identify and select appropriate tools for analysis
- Learn basic principles governing the financial management of corporation
- Communicate the issues, implications, alternatives and recommendations of financial decisions to users of information

### Textbooks and Course Materials:

(Recommended) Brealey, R. Myers, C. Marcus, A.J. Manes, E.M. and Mitra D. Fundamentals of Corporate Finance, Seventh Canadian Edition, Toronto, McGraw-Hill, ISBN: 13: 978-125902496-2

(No Connect needed)

You will need a simple financial calculator for this course to write midterms. I strongly recommend Texas Instruments BA II Plus if you don't have a calculator with financial functions. Other options including using an online Time value of money calculator and Microsoft Excel and time value of money tables.
