Course Description:

This course brings all of the Project Management Institute (PMI) knowledge areas of project management together into a consolidated whole, and provides the student an understanding of project management methodologies as well as the tools and techniques used to plan, execute and control various types of projects.

Learning Outcomes:

- Describe the evolution of the project-based organizational structure
- Describe the framework of a project-based workplace and its implications for other components of management
- Apply knowledge of PM principles to understand real world industries
- Work successfully in diverse project teams
