Course Description:

This course will cover the theory and concepts of financial accounting under both IFRS and ASPE with a focus on current and long-term liabilities, shareholders equity, employee benefits, and the statement of cash flows. This is a lecture style course that includes textbook readings, in-class lectures, and in-class group discussions and problem solving.

Learning Outcomes:

Assess the accounting issues associated with the liabilities and shareholders' equity side of the Statement of Financial Position in order to determine the most appropriate approach to the recognition, measurement, presentation, and disclosure of these issues (under both IFRS & ASPE accounting frameworks).

Account for income taxes, employee future benefits and leases.

Prepare two financial statements – the Statement of Shareholders' Equity and the Cash Flow Statement and communicate the results using the appropriate format.

Apply present value concepts to solve accounting problems.

Account for changes in accounting policy, estimates, and errors.
