

Brief Course Outline

Course Title: **Statistics**

Course Number and Section:

MOS

2242B 551

Instructor Name(s): Federico Pasini

Instructor Email(s): fpasini@uwo.ca

Disclaimer: Information in the brief course outline is subject to change. The syllabus posted on OWL is the official and authoritative source of information for the course.

Course Description:

The ability to extract useful information from data is one of the most important and marketable skills a student of business can acquire. The purpose of this course is to introduce quantitative decision-making skills, with an emphasis on statistical analysis techniques used in management. Topics include: descriptive statistics, probability, confidence intervals, hypothesis testing, analysis of variance, correlation and regression analysis, and survey techniques.

Learning Outcomes:

Extrapolate information from data sets and represent it in an informative manner

Calculate descriptive statistics measures as used in business decisions

Quantify the uncertainty associated with a statistical measure and use it to make informed decisions

Set up hypothesis tests to make inferences on the most common statistical parameters

Forecast growth trends and understand the relationships between the different variables of a data set

Textbooks and Course Materials:

Douglas A. Lind, William G. Marchal, Samuel A. Wathen, Carol Ann Waite, Kevin Murphy, Basic Statistics for Business and Economics - 7th Canadian Edition.

Print text (ISBN: 9781260326963) or eBook (ISBN: 9781264970315), according to the student's personal preference.

Methods Of Evaluation:

Assignment	Due Date mm/dd/yy	Weight - %
Midterm	02/29/2024	32
Online quizzes	throughout the term	16
Weekly exercises	throughout the term	12

Assignment	Due Date mm/dd/yy	Weight - %
Final exam	TBD	40
