Course Description:

Business ethics is the study of business situations, activities, and decisions where issues of right and wrong arise. Rarely are these issues simple or straightforward. But while there are no easy answers, there are better or worse ones. We study business ethics to develop tools that help us justify the claim that certain decisions should be evaluated as ethical or unethical, or right or wrong. We will spend the next twelve weeks developing tools to think about business ethics productively.

Learning Outcomes:

- Identify, describe and apply key business ethics concepts
- Identify morally relevant factors in a business case from the perspective of different stakeholders, and derive ethical guidelines to aid in decision-making
- Defend ethical recommendations in a way that concedes their strengths and limitations, and apply them to similar actual and hypothetical business cases
- Paraphrase business ethics arguments and assess their merit
